County Employment and Wages in Kansas – Second Quarter 2016

Employment rose in the four largest counties in Kansas from June 2015 to June 2016, the U.S. Bureau of Labor Statistics (BLS) reported today. (Large counties are defined as those with employment of 75,000 or more as measured by 2015 annual average employment.) Assistant Commissioner for Regional Operations Stanley W. Suchman noted that Wyandotte County experienced the fastest rate of job growth, up 1.6 percent over the year, and exceeded the national job growth rate of 1.5 percent.

Nationally, employment increased in 291 of the 344 largest U.S. counties from June 2015 to June 2016. Williamson, Tenn., posted the largest percentage increase with a gain of 6.7 percent over the year. Midland, Texas, had the largest over-the-year percentage decrease in employment among the largest U.S. counties with a loss of 8.3 percent.

Among the four largest counties in Kansas, employment was highest in Johnson County (338,700) and lowest in Wyandotte (91,100). Together, the four largest counties accounted for 56.3 percent of total employment within the state. Nationwide, the 344 large counties made up 72.5 percent of total U.S. employment.

Average weekly wages increased in three of the four large counties in Kansas from the second quarter of 2015 to the second quarter of 2016. Wyandotte County recorded over-the-year wage growth of 3.5 percent, exceeding the 2.2-percent increase for the nation. Johnson had the highest average weekly wage (\$1,020) among Kansas's large counties and was above the national average of \$989. (See [table 1](#).)

Employment and wage levels (but not over-the-year changes) are also available for the 101 counties in Kansas with employment below 75,000. Of these smaller counties, only Coffey (\$1,072) had an average weekly wage above the national average. (See [table 2](#).)

Large county wage changes

Wyandotte County's 3.5-percent wage gain was the largest among the state's large counties and placed 66th in the national ranking. (See [table 1](#).) The state's three remaining large counties placed in the bottom quartile of the national ranking in wage growth—Shawnee (0.9 percent, 277th), Sedgwick (0.7 percent, 289th), and Johnson (0.0 percent, 305th).

Among the 344 largest U.S. counties, 304 had over-the-year increases in average weekly wages in the second quarter of 2016. McLean, Ill., had the largest percentage increase in average weekly wages with a gain of 21.0 percent. Nationally, 36 large counties experienced over-the-year decreases in average weekly wages. Ventura, Calif., had the largest percentage decline in average weekly wages with a loss of 8.4 percent.

Large county average weekly wages

Johnson County's average weekly wage of \$1,020 ranked 81st among the 344 largest U.S. counties in the second quarter of 2016. Wyandotte recorded an average weekly wage of \$928 and placed 156th in the national ranking. The state's remaining large counties, Sedgwick (\$858, 222nd) and Shawnee (\$802, 283rd), had average weekly wages that placed them in the bottom half of the ranking.

Nationally, weekly wages were higher than the U.S. average of \$989 in 102 of the 344 largest counties. Santa Clara, Calif., held the top position with an average weekly wage of \$2,252. San Mateo, Calif., was second at \$1,871, followed by New York, N.Y. (\$1,866) and San Francisco, Calif. (\$1,806). Among the 241 large counties with an average weekly wage below the U.S. average in the second quarter of 2016, Horry, S.C. (\$598) reported the lowest wage.

Average weekly wages in Kansas's smaller counties

Of the 101 counties in Kansas with employment below 75,000, only Coffey County (\$1,072) had an average weekly wage above the national average of \$989. Elk County reported the lowest weekly wage in the state with an average of \$456 in the second quarter of 2016. (See [table 2](#).)

When all 105 counties in Kansas were considered, all but 2 had wages below the national average. Twenty-nine reported average weekly wages under \$600, 25 reported wages from \$600 to \$649, 28 had wages from \$650 to \$699, 13 had wages from \$700 to \$749, and 10 had wages \$750 or higher. (See [chart 1](#).)

Additional statistics and other information

Quarterly data for states have been included in this release in [table 3](#). For additional information about quarterly employment and wages data, please read the Technical Note or visit the QCEW Web site at www.bls.gov/cew/.

Employment and Wages Annual Averages Online features comprehensive information by detailed industry on establishments, employment, and wages for the nation and all states. The 2015 edition of this publication contains selected data produced by Business Employment Dynamics (BED) on job gains and losses, as well as selected data from the first quarter 2016 version of the national news release. Tables and additional content from *Employment and Wages Annual Averages 2015* are now available online at www.bls.gov/cew/cewbultn15.htm.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: 1 (800) 877-8339.

The County Employment and Wages release for third quarter 2016 is scheduled to be released on Tuesday, March 7, 2017.

Technical Note

Average weekly wage data by county are compiled under the Quarterly Census of Employment and Wages (QCEW) program, also known as the ES-202 program. The data are derived from summaries of employment and total pay of workers covered by state and federal unemployment insurance (UI) legislation and provided by State Workforce Agencies (SWAs). The 9.7 million employer reports cover 142.7 million full- and part-time workers. The average weekly wage values are calculated by dividing quarterly total wages by the average of the three monthly employment levels of those covered by UI programs. The result is then divided by 13, the number of weeks in a quarter. It is to be noted, therefore, that over-the-year wage changes for geographic areas may reflect shifts in the composition of employment by industry, occupation, and such other factors as hours of work. Thus, wages may vary among counties, metropolitan areas, or states for reasons other than changes in the average wage level. Data for all states, Metropolitan Statistical Areas (MSAs), counties, and the nation are available on the BLS Web site at www.bls.gov/cew/; however, data in QCEW press releases have been revised and may not match the data contained on the Bureau's Web site.

QCEW data are not designed as a time series. QCEW data are simply the sums of individual establishment records reflecting the number of establishments that exist in a county or industry at a point in time. Establishments can move in or out of a county or industry for a number of reasons—some reflecting economic events, others reflecting administrative changes.

The preliminary QCEW data presented in this release may differ from data released by the individual states as well as from the data presented on the BLS Web site. These potential differences result from the states' continuing receipt, review and editing of UI data over time. On the other hand, differences between data in this release and the data found on the BLS Web site are the result of adjustments made to improve over-the-year comparisons. Specifically, these adjustments account for administrative (noneconomic) changes such as a correction to a previously reported location or industry classification. Adjusting for these administrative changes allows users to more accurately assess changes of an economic nature (such as a firm moving from one county to another or changing its primary economic activity) over a 12-month period. Currently, adjusted data are available only from BLS press releases.

Table 1. Covered employment and wages in the United States and the 4 largest counties in Kansas, second quarter 2016

Area	Employment			Average weekly wage ⁽¹⁾			
	June 2016 (thousands)	Percent change, June 2015-16 ⁽²⁾	National ranking by percent change ⁽³⁾	Average weekly wage	National ranking by level ⁽³⁾	Percent change, second quarter 2015-16 ⁽²⁾	National ranking by percent change ⁽³⁾
United States ⁽⁴⁾	142,717.2	1.5	--	\$989	--	2.2	--
Kansas	1,378.4	-0.2	--	829	38	1.2	39
Johnson, Kan.	338.7	0.3	276	1,020	81	0.0	305

Wyandotte, Kan.	91.1	1.6	160	928	156	3.5	66

Footnotes:

(1) Average weekly wages were calculated using unrounded data.

(2) Percent changes were computed from quarterly employment and pay data adjusted for noneconomic county reclassifications.

(3) Ranking does not include data for Puerto Rico or the Virgin Islands.

(4) Totals for the United States do not include data for Puerto Rico or the Virgin Islands.

Note: Data are preliminary. Covered employment and wages includes workers covered by Unemployment Insurance (UI) and Unemployment Compensation for Federal Employees (UCFE) programs.
